

A D'CASA brings your projects to life

With an innovative approach, we operate across construction, architecture, carpentry and furniture, overseeing every stage from concept to completion.

From idea to design. From design to construction.

Our team of specialised engineers and architects combines expertise with state-of-the-art technology and extensive experience in both national and international projects. We are committed to quality, precision and meeting deadlines, turning your vision into reality.

D'Casa was born from the union of two complementary areas that work in harmony to create complete, functional and distinctive projects.

We transform
wood into the
shape of your
dreams.

OUR

FABRIC

THE FACTORY

IN-HOUSE CARPENTRY INDUSTRY 4.0

Our 4.0 carpentry facility is where tradition and innovation come together to create products of excellence through cutting-edge technology, with a strong focus on efficiency, precision and sustainability.

We are equipped with state-of-the-art machinery that combines the finest craftsmanship with the latest digital innovations.

Here, craftsmanship takes on a new dimension. CNC (Computer Numerical Control) machines are at the heart of our production floor, enabling us to create bespoke furniture tailored to each client's requirements with millimetre precision, while increasing efficiency and reducing material waste.

PROJECTS

FOZ FIVE

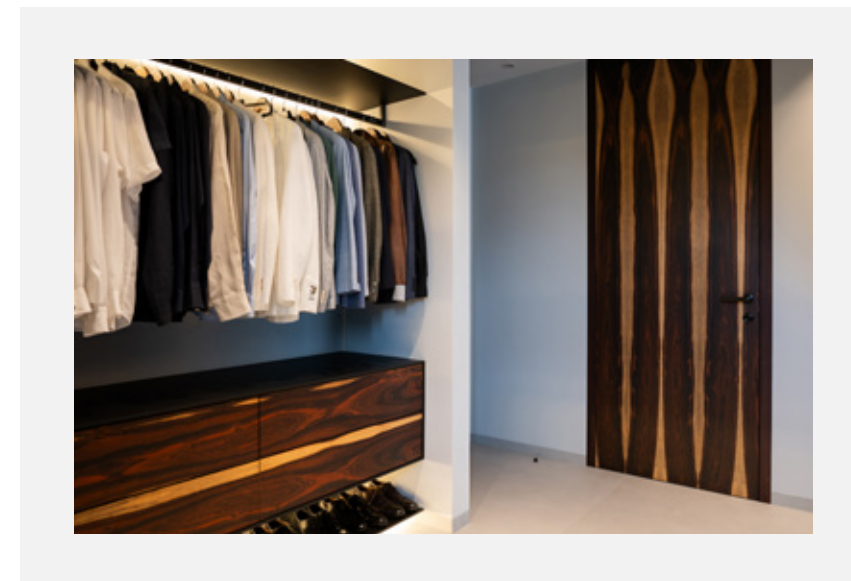

Villa 1 • Luxury & Elegance

Foz Five Exclusive Villas is a private development comprising five townhouses, thoughtfully designed for families who value exclusivity, comfort and sophistication in a prime location.

Located in Nevogilde, just a five-minute walk from Molhe da Foz, the development is set along an almost private street, where silence prevails, creating a profound sense of peace and tranquillity.

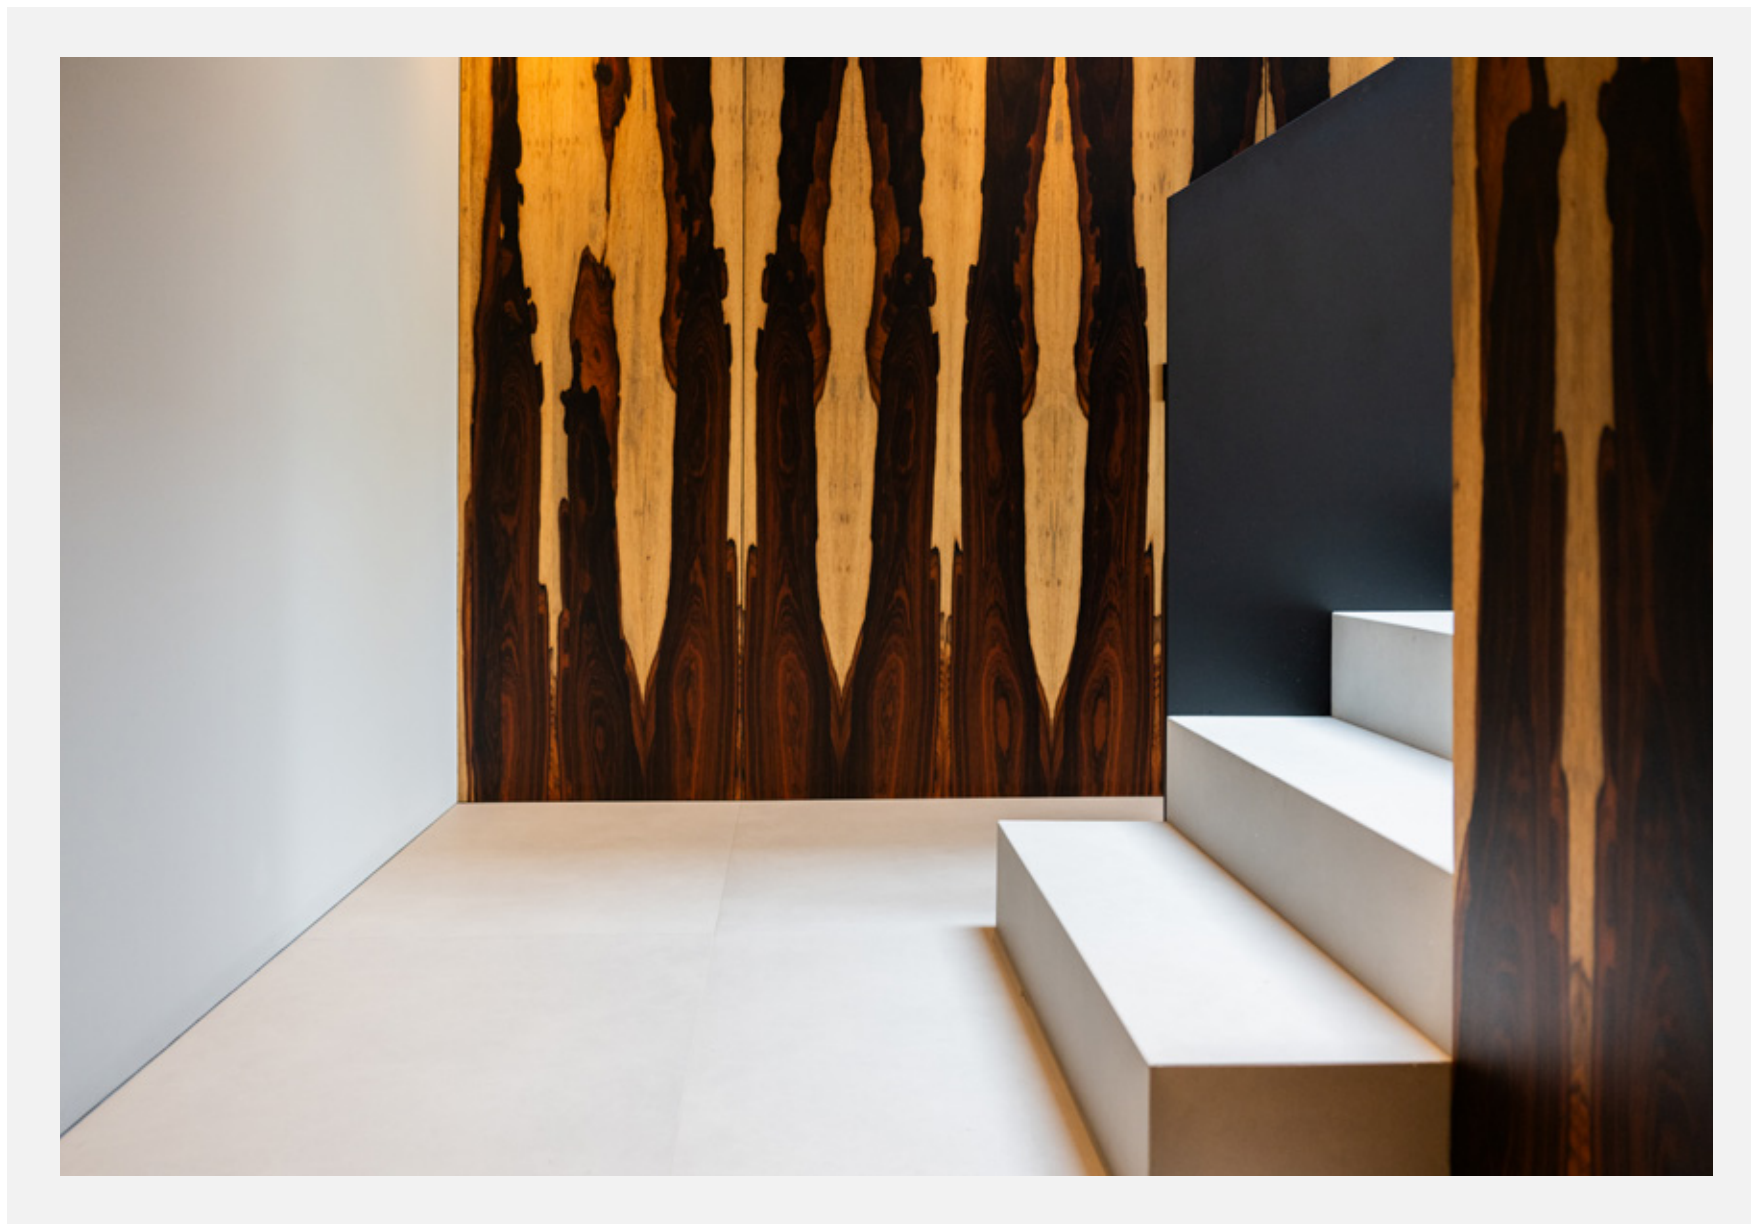

A project where luxury is revealed in every detail. In this residence, exceptional construction is complemented by high-precision joinery, creating sophisticated, elegant and timeless interiors. Premium materials, outstanding finishes and meticulous attention to detail reflect an uncompromising commitment to quality and exclusivity.

BOAVISTA 5205

Exclusive Residences

At Boavista 5205, every space has been thoughtfully designed to be enjoyed at a slower pace, with comfort and attention to detail.

Located on Avenida da Boavista, just minutes from Castelo do Queijo, this collection of T4 and T4+1 apartments, spread across two floors, offers a living experience defined by privacy, natural light and a serene connection with its surroundings.

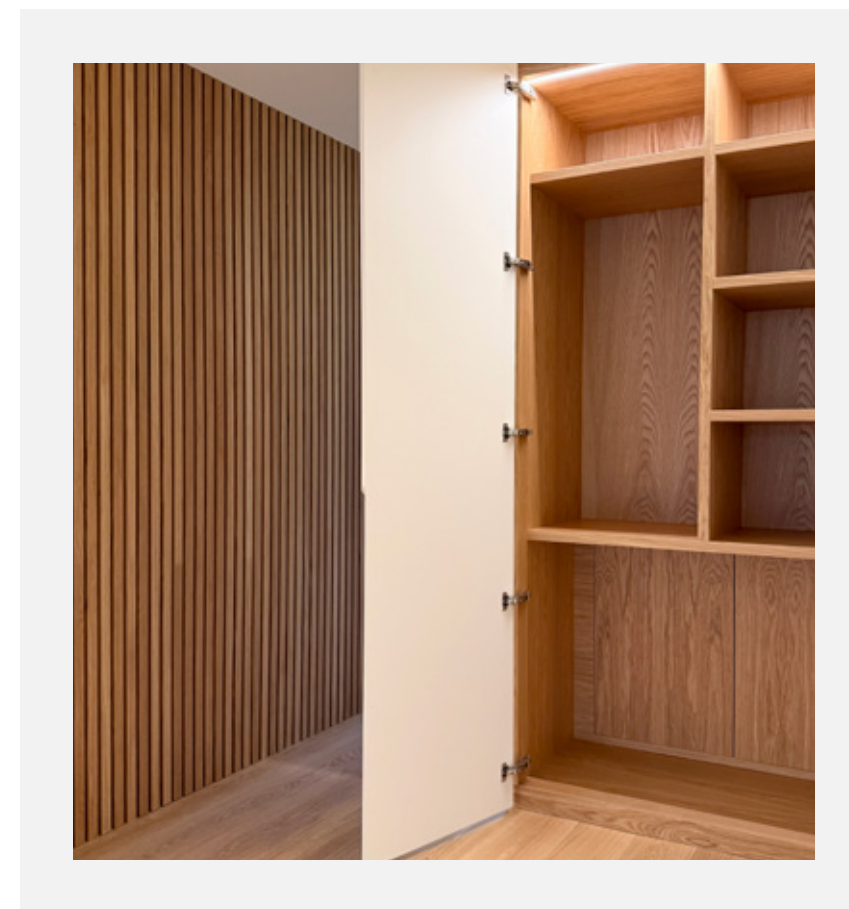

Designed by A43 architecture studio, the architecture establishes a contemporary, balanced and timeless language, creating the perfect setting for high-quality interiors.

MOSCAVIDE HOUSE

Detail & Precision

Moscavide House is a contemporary apartment in Lisbon, conceived around an exploration of visual continuity, transparency and material restraint.

The interior architecture project embraces a refined and sensory language, where natural light, reflections and materiality shape the experience of the space.

This project is a contemporary interpretation of living: quiet, refined and deeply sensory. Rather than simply designing spaces, the intervention seeks to create atmospheres, places where natural light, noble materials and transparency engage in a continuous dialogue.

QUINTA MARQUES GOMES

Exclusivity & Identity

Quinta Marques Gomes is an exclusive development with a distinctive architectural identity. All the residences have been designed with green roofs, landscaped hedges and carefully selected exterior finishes in organic tones, creating visual harmony and minimising the impact of the buildings on their surroundings.

A residence where contemporary architecture merges seamlessly with the natural landscape. Exceptional construction quality and bespoke joinery enhance every space, creating a sophisticated, functional environment designed for harmonious living and a seamless connection with the surrounding landscape.

Plot 112 Residence · Vila Nova de Gaia, Portugal · 2024

OCEAN TERRACE

Contemporary Precision & Timeless Comfort

In this apartment, the interior architecture strategy is rooted in a contemporary, minimalist and timeless language, with materiality serving as the defining element. Oak takes centre stage, bringing cohesion, warmth and sophistication throughout the space.

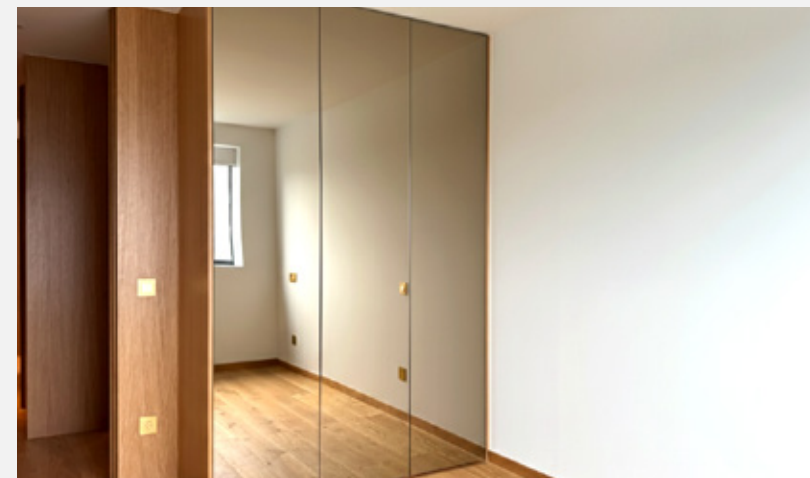

The design was conceived as a continuous system of relationships between social and private areas, where natural materials, warm tones and bespoke elements create a harmonious sensory experience.

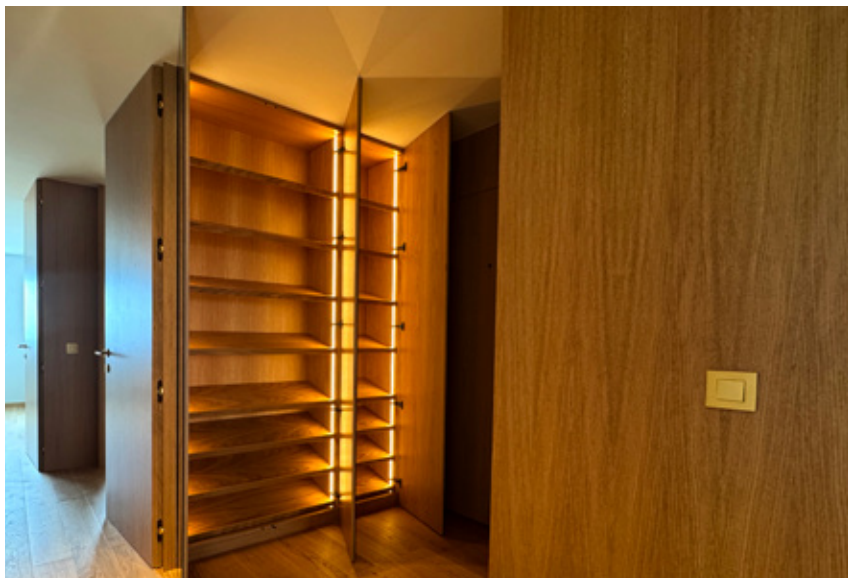

Walnut, exotic Green Jade stone and bold colour accents serve as the project's defining threads.

MARBLE TERRACE

Exclusivity is Living Well

Marble Terrace is an exclusive residential development comprising three contemporary buildings, with 57 premium apartments ranging from one- to three-bedroom units. All apartments include private parking and dedicated storage space.

The communal areas have been thoughtfully designed to offer residents a luxurious living experience, with access to exclusive amenities including a lounge garden, library, coworking space, gym, spa with sauna and Turkish bath, and laundry facilities.

Marble Terrace is a contemporary residential development designed to meet the needs of young urban families seeking high-quality living in a prime location.

ITGEST ANGOLA OFFICES

Training Centre, Art Gallery & Architecture

The ITGEST facilities in Ilha de Luanda house the Wise ID Professional Training Centre, spanning 220 m² and comprising technical and executive training rooms equipped with innovative technology.

MANOEUVRE, the African Art Gallery, covers 140 m² and promotes African artists, providing a dedicated space for artistic exhibitions and for fostering a critical understanding of Contemporary African Art.

ID CONCEPT, the Architecture and Interior Design Studio, occupies 30 m² and develops architectural projects with a contemporary aesthetic, integrating technological solutions, high-quality materials, sophisticated furniture and lighting.

Training Centre ITGest · Luanda, Angola · 2024

ITGEST ANGOLA OFFICES

Technology Centre Nova Vida

Expansion project for ITGest's offices in the Nova Vida Urbanisation.

The 250 m² facility is spread across two floors. The lower floor is dedicated to the IT infrastructure team and is fully equipped with advanced technology, including the project monitoring centre: the SOC (Security Operations Centre). The upper floor comprises open-plan workspaces interspersed with three multifunctional rooms designed for internal team meetings and client meetings.

The meeting rooms are equipped with state-of-the-art audiovisual solutions, providing the technological capabilities required for the day-to-day operations of a high-performance Technology Centre.

ITGEST LISBOA OFFICES

Precision, Comfort & Design

Fit-out project for ITGest's offices, located on Avenida da República in Lisbon.

Designed to meet the demands of a modern and dynamic working environment, the space prioritises functionality, comfort and collaboration between teams.

The project stands out for the quality of its construction and joinery, with particular attention to finishes and the integration of technical and technological solutions that ensure an efficient, contemporary working environment aligned with the company's identity.

ITGEST NIGERIA OFFICES

Innovation & Commitment

A 94 m² office space comprising a reception area, an open-plan workspace for the IT team, two private offices and an executive meeting room.

With a contemporary aesthetic, the space prioritises natural light, natural materials and the sense of openness required for a productive working environment.

Glass partitions create a greater sense of spaciousness while allowing natural light to flow throughout the space. Natural oak panels, flooring and furniture bring warmth, comfort and luminosity to the interiors.

At the heart of the space, the open-plan area is punctuated by an unexpected lime-green lacquered niche, creating a distinctive identity for this technology-focused workspace.

OUR

METHOD

With an innovative approach to construction, D'Building is reshaping the sector by redefining the way projects are conceived, planned and delivered. New technologies and methodologies combine traditional construction expertise with the know-how of our teams, driving efficiency, sustainability and safety through the use of advanced materials, including high-performance concrete and next-generation solutions.

This approach enables us to deliver projects to the highest standards, with meticulous attention to detail and design, while promoting more durable and sustainable construction.

PROJECTS

MENIN WINERY, DOURO

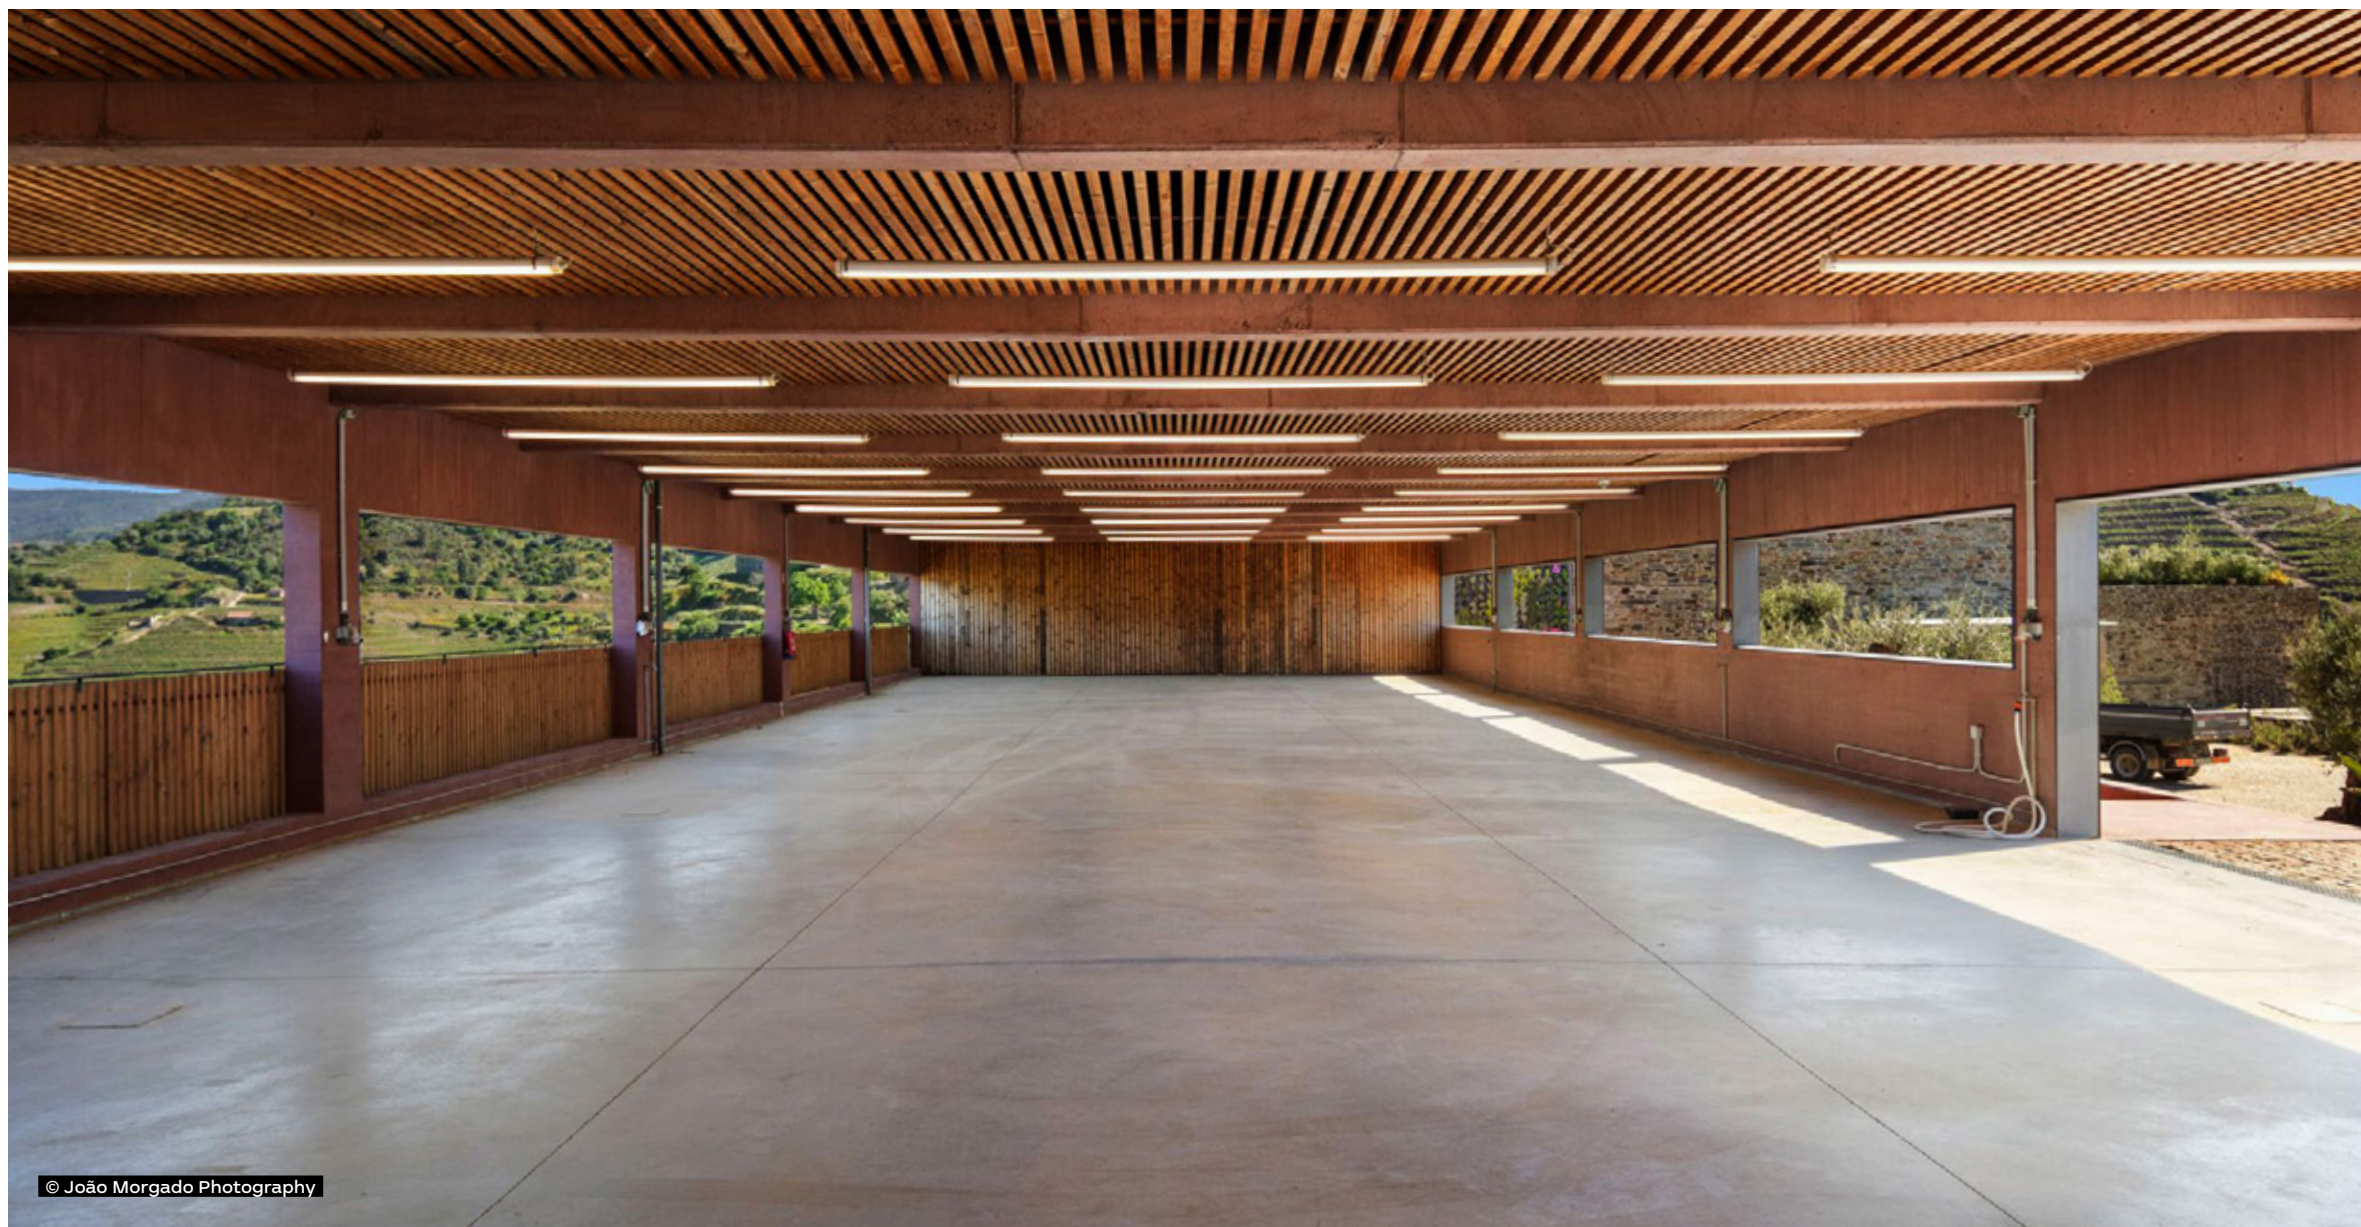

Wine Industry

GRAVITY-FED WINEMAKING FACILITY

The construction of the Gravity-Fed Winemaking Facility at Adega Menin, Quinta da Costa e Sol, in the Douro, was carried out by D'Casa. Designed by Arnaldo + João Pimentel Barbosa, the architectural project is now recognised as a reference in the wine industry and has been featured on ArchDaily:

ECORK HOTEL

Sustainability & Well-Being

Ecork is a hotel in Évora, southern Portugal, featuring a spa, health club, gym, restaurant, bar, meeting rooms, outdoor swimming pool and 56 bungalows. Set across a total area of 6,300 m² among cork oak and olive trees, the hotel and all its associated facilities are housed within a single building, leaving the surrounding area dedicated to the bungalows.

The architectural project was designed by architect José Carlos Cruz. Influenced by vernacular and Moorish architecture, characteristic of southern Portugal, the design takes the form of a monolithic volume with small openings to the exterior. Combined with a fully recyclable cork-clad façade, this design provides thermal protection for the building.

Built around a large central courtyard, the layout was conceived to take advantage of cross ventilation and natural airflow, reducing energy consumption to the minimum required.

ACTA THE CLOVER HOTEL

In the Heart of Porto

The construction of the Acta "The Clover" Hotel in the heart of Porto was carried out by D'Building – D'Casa. The project involved the rehabilitation of a pre-existing historic building.

With 12 hotels across Spain, Acta Hotels chose Porto as its first destination in Portugal, expanding its presence into the Portuguese market. The hotels are typically urban, strategically located for visitors looking to stay close to the city's main points of interest, as well as for business travellers.

The existing building is an icon of Porto's 1960s and 1970s architecture, designed by architect and urban planner Manuel Marques de Aguiar in the late 1950s. Acta "The Clover" Hotel occupies part of the "Lar Familiar" building, which established a distinctive identity within the city through its robust construction and functional design as a space for services, commerce and residential use.

OCEAN TERRACE

Residential Project

Ocean Terrace is a premium/luxury residential development designed for family living. It comprises contemporary T1 to T4 duplex apartments, featuring generous balconies with sweeping views over the horizon and sea. The apartment buildings are set within extensive landscaped gardens, complete with a swimming pool and padel courts.

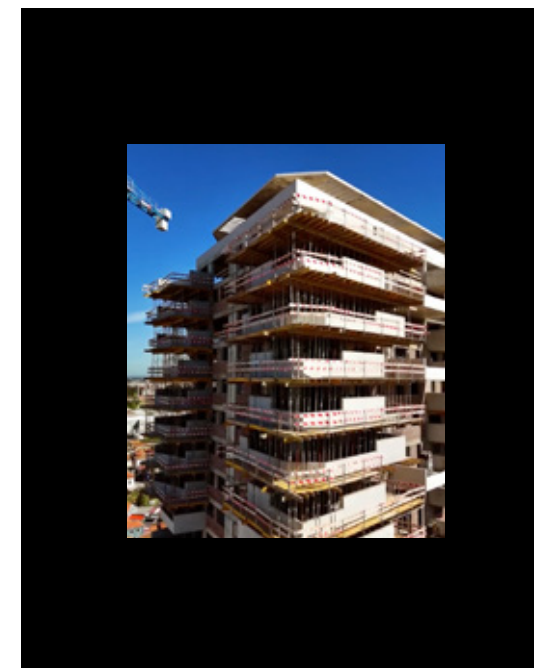

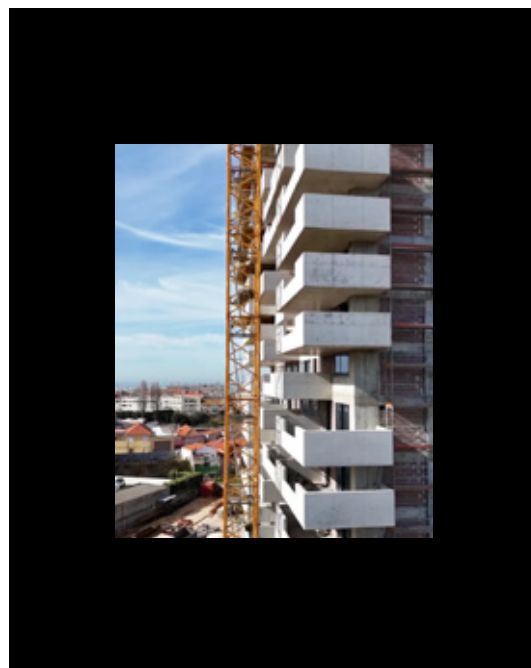

Plot 7, the 22-storey tower, comprises 113 apartments ranging from T1 to T4 duplex units. Crowning the Ocean Terrace development on the 22nd floor is a penthouse offering panoramic views, an expansive and sophisticated outdoor area, a dynamic swimming pool and jacuzzi. The T3 penthouse has a total gross area of 526 m², comprising 216 m² of interior space and 310 m² of outdoor space.

Ocean Terrace · Leça da Palmeira, Portugal · 2026

MARBLE TERRACE

Residential Project

Marble Terrace is a residential development located just a few metres from the centre of Gondomar, along Avenida Mário Soares, a wide and prominent main road. With excellent access to the region's main road networks, it offers the perfect setting for living within easy reach of Porto city centre.

Marble Terrace is a thoughtfully designed residential development comprising 49 apartments, ranging from T1 to T4, conceived to promote comfort and well-being.

A place where calm and tranquillity take centre stage, away from the hustle and bustle of overly dense residential developments.

FOZ FIVE

VILLA 1

Foz Five Exclusive Villas is a private development comprising five townhouses, thoughtfully designed for families who value exclusivity, comfort and sophistication in a prime location.

Located in Nevogilde, just a five-minute walk from Molhe da Foz, the development is set along an almost private street, where silence prevails, creating a profound sense of peace and tranquillity.

Foz Five Exclusive Villas is situated close to the beautiful beaches of Foz do Douro and just five minutes from City Park. It is also conveniently located near international schools and the Catholic University, with excellent transport links and just 15 minutes from Francisco Sá Carneiro Airport. The surrounding area offers a wide range of traditional shops, excellent restaurants and public transport options.

Enjoy the privilege of living in an exceptionally peaceful setting, where everyday essentials are within easy reach, while the city and the main routes connecting Greater Porto and the rest of the country are only a short journey away.

QUINTA MARQUES GOMES

Plot 63

Quinta Marques Gomes is an exclusive development with a distinctive architectural identity. All residences have been designed with green roofs, landscaped hedges and carefully selected exterior finishes in organic tones, creating visual harmony and minimising the impact of the buildings on their surroundings.

The development prioritises distinctive and innovative solutions, with minimal visual density, creating a practical living experience adapted to the evolving demands of contemporary housing. The result is a more comfortable way of living, where design, functionality and integration with the surrounding environment are carefully balanced to provide the highest quality of life.

MATOSINHOS LOUNGE OFFICES

Office Building

Matosinhos Lounge Offices enjoys a privileged location in the heart of Matosinhos, surrounded by a collection of emblematic buildings of significant historical value.

The architecture and interior design project involved the conversion of a former service building into a premium corporate lounge office space. Generous and filled with natural light, the space features a landscaped courtyard that enhances and extends its tranquil atmosphere, creating an environment defined by comfort and quality. The building is arranged over two floors within the existing volume of the former warehouse, providing a total area of 1,260 m².

Matosinhos Lounge Offices represents a high-quality investment in the integration of health and well-being principles into architectural design, as well as in the development of a sustainable, resource-efficient building with LEED certification.
